WORK EXPERIENCE

TeeTurtle

Saint Louis, MO (Remote)

Frontend Development Lead

April 2023 - June 2024

- Oversaw small and large-scale web development projects, directly improving the TeeTurtle eCommerce platform's user experience and system architecture using HTML, CSS, JavaScript, and Liquid.
- Led the technical aspects of migrating and redesigning TeeTurtle's eCommerce store from a PHP-based platform to Shopify, resulting in a 15% increase in page load speed, a 15% boost in conversion rates, and a 20% improvement in overall user engagement, while ensuring a seamless user transition and optimizing the online shopping experience.
- Implemented the SCRUM framework within the engineering team, increasing workflow efficiency by 30% and reducing project delivery times by 20% through the adoption of sprint-based tracking and management using Jira.
- Spearheaded the integration of modern web development practices, contributing directly to coding, troubleshooting, and refining the platform for better performance, scalability, and accessibility.

Frontend Developer

March 2021 - April 2023

- Enhanced TeeTurtle's eCommerce platform by developing responsive frontend interfaces with HTML, CSS, and JavaScript, and transformed design concepts into functional sites, leveraging Adobe XD for initial wireframing.
- Improved online customer engagement by building and integrating an edit order portal, a post-checkout donation feature, and an optimized order summary into the post-checkout page, resulting in a smoother and more intuitive user experience.
- Spearheaded the development of a company intranet application using Wagtail CMS and Django, improving internal processes and resource accessibility for over 100 employees, which increased operational efficiency by 20%.
- Implemented and managed Firebase hosting with a push-to-deploy GitHub pipeline and Google authentication, streamlining secure and efficient collaboration on HTML prototypes across multiple teams.

SH1FT Digital

Montreal, QC (Remote)

Frontend Developer Intern

November 2020 - March 2021

- Contributed to the development of a React-based application to connect therapists with clients by translating UX wireframes into reusable components, ensuring the creation of dynamic, user-friendly, and responsive web pages.
- Integrated Firebase Authentication with Axios for sign-in functionalities and utilized Redux alongside Firebase Realtime for managing state and displaying personalized, dynamic client and therapist data.
- Developed and implemented advanced search algorithms with Google Maps API, improving the efficiency of matching therapists and clients based on preferences and geographical distance.

PROJECTS

FridgeRaider AI

San Jose, CA

React, OpenAI 3.5 Turbo API, Material UI, Firebase

June 2024 - July 2024

- Developed an innovative React application designed to assist users in generating recipes from leftover ingredients, effectively reducing food waste and promoting sustainable cooking practices.
- Implemented the OpenAI 3.5 Turbo API to integrate advanced AI functionalities, utilized the Material UI component library to create a polished user interface, and hosted the application on Firebase for a seamless deployment.

SKILLS

Languages: HTML, CSS, JavaScript, Typescript, Liquid, Python, SQL
Frameworks & Libraries: React, Redux, jQuery, Material UI, Chakra UI, Bootstrap, GSAP
Platforms: GitHub, BitBucket, Jira, Firebase, Adobe XD, Shopify Plus
